Standard Equipment/Optional Equipment

tensile steel pressure plates to control forward/reverse travel and body height. This enables precise load handling and a smooth and stress-free working environment.

CatSYS Load Control. The compact and simple CatSYS Load Control system is another standard feature. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

HSE truck wins award for safety at transfer. Linde Truck Services introduces the world’s first Category 1 Forklift Truck to market. The Sentinel truck is a Category 1 Forklift Truck that is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

The Sentinel truck is a Category 1 Forklift Truck that is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency. The operator can control all functions of the mast hydraulically and intuitively. This reduces the working load and the handling requirements. All movements are clearly visualised on the screen.

Linde Load Control

Linde Load Control is a state-of-the-art electronic load control system. It is designed for maximum safety and efficiency.
