ORDER PICKER N20 C L

CAPACITY 1200 KG | SERIES 4590

Safety

The design of the order picker ensures that the operator remains within the truck contours at all time and the standard load backrest ensures protection from falling objects on the lifted forks. Lowering of the forks is not possible without operator's detection in the platform and mast commands are integrated on the backrest to ensure that the operator has eyes on the load.

Performance

The N20 C L has a total capacity of 1200 kg and is able to reach a top speed of 12 km/h unloaded thanks to its powerful 3 kW AC motor. It is highly manoeuvrable even in the narrowest aisle thanks to its compact dimensions. The mast commands are located on both sides of the backrest for easy operation. The raising platform option enables efficient picking at the first level thanks to 2.8 m picking height.

Comfort

The pneumatically damped workstation provides relief and comfort to operators from shocks due to rough flooring. Combined with the height adjustable Linde Steering Wheel and foldable seating

support, operator's experience utmost comfort whilst driving. Picking operations are also made easier with the working bench provided by the lifted forks.

Reliability

The trucks are designed, built and tested for consistent reliability in demanding applications. The motor, sub-components and electronics are all protected within the robust chassis structure, which can be further reinforced by different front chassis options. These features guarantee a longer operating life, whilst delivering safe, efficient, and productive load handling.

Service

Efficiency at work and when servicing with cost effective maintenance routines are important. With service intervals of up to 1000 hours and a computerized diagnostic system via CAN-bus, maintenance interventions are minimal and operating costs are reduced. Easy accessibility to all components thanks to the front panel and the maintenance free AC technology play an additional part in maximizing uptime.
