

Standard Equipment/Optional Equipment

Standard Equipment

Safe, comfortable operator compartment with unique "U" shaped platform linking: scoop seat, platform and console
 Power assisted steering with variable steering resistance
 Positive steering (drive wheel) feedback
 Automatic and adjustable speed reduction when cornering
 3 kW AC motor (maintenance free)
 Automatic electric braking
 Electromagnetic emergency brake
 Key switch or log-in PIN code
 Dedicated work station (with storage compartments)
 Removable storage compartment/bin under scoop seat
 Fixed front clipboard

Adjustable scoop seat
 Adjustable console and twin grip steering control
 CAN bus technology
 Multifunction backlit instrument display: Safety alarm, maintenance check indicator, battery charge level, hourmeter
 Cushion rubber drive and load wheels
 Single position hook (300 mm) or supplied with 4 mounting bolts for local fitting of towing device
 Vertical battery change (3 or 4 PzS)
 Horn
 Protection to -10°C

Optional Equipment

Manually operated hook with pull cable (300 mm)
 3 position tow hook 290/345/400 mm
 Towing attachment control (Forward/backward)
 Removable storage compartment/locker under the scoop seat
 Support for data terminal, clipboard and barcode reader (Pack n°2)
 Front and rear working lights (LED)
 Flashing beacon
 Polyurethane drive wheel & cushion rubber load wheels
 Non-marking cushion rubber drive & load wheels

Wet grip drive wheel & cushion load wheels
 Vertical battery change 5 PzS
 Side battery change (3 or 4 PzS)
 Fixed battery stand for side battery change (2 battery stands)
 Linde Connected Solutions:
 ac:access control, an:usage analysis, dt:crash detection

Other options available on request

Li-ION technology

Fast Full Charge
 Opportunity Charging
 Fast Intermediate Charging
 Maintenance Free
 Long Lifetime
 Good performance in Cold Store

Li-ION batteries

fits in 3 PzS compartment (P30 C ION, P50 C ION) with 9kWh (24V/410Ah)

Li-ION charger

optimized 24V-Charger v255: full charging time in 2h40min (9,0 kWh)

Safety

The design of the tractors ensure that the operator remains well within the truck contours while driving. The ergonomic twin grip steering control incorporates a wrap-around hand guard and the front steel bumper ensure excellent safety for both operator and machine.

Performance

The P 30 C & P 50 C are compact tow tractors particularly suited to towing applications in narrow aisles. Due to their compact nature the operator has direct access to the towing attachment located at the rear. They share common components and are both powered by a 3 kW AC motor. The P 30 C and P 50 C can tow 3,000 kg and 5,000 kg respectively.

Comfort

The unique design of the operator's compartment offers a high level of comfort. In addition to an adjustable scoop seat and console/steering control, these tow tractors provide a unique suspended and damped "U" shape platform. This links the 3 main point of contact between operator and machine: scoop seat, platform and console and provides a superior driving experience over long travel distances or uneven floors.

Features

Driving system

→ Standard truck converted in to a robotic truck
 → Dual driving mode - automatic/manual
 → Navigation laser, safety front scanner, 3D camera, embedded computer, emergency stop buttons, light and sound warning indicators

Standard truck

→ all benefits from standard truck
 → Standard manoeuvrability
 → No rollback on uphill starting
 → Standard serviceability

Geoguidance navigation

→ Innovative infrastructure-free technology (no reflectors)
 → Relies on existing structural features (walls, columns, racks...)
 → Real time mapping and localization
 → Seamless integration in existing layouts, gradual extension or global deployment

Operations management

→ Stand alone or WMS/ERP directed
 → Supervisor software for task and smart traffic management
 → Various task triggers such as call buttons, sensors, PLCs, supervisor software...

AC Motor

→ Powerful, smooth 3 kW at 100% performance
 → Moisture and dust-proof motor, maintenance-free
 → Maximum speed of 8 km/h, whether the truck is laden or unladen

User interface

→ Ergonomically designed console incorporates steering control, clipboard, emergency isolator CAN bus plug and Linde Digital Information Display (hourmeter, battery discharge indicator, warning and information display)
 → Adjustable in height, the console provides controls and instrumentation all within easy reach

Smart safety

→ Real time speed-adaptive detection fields
 → Unique dynamic cornering detection fields
 → Autonomous decision-making capability with 3D camera
 → Natural cohabitation with operators and other trucks

Comprehensive energy solutions

→ Range of Lead Acid batteries from 2,13kWh to 8,88 kWh (375-625Ah)
 → Battery locking system for side change option secures battery compartment and assists the battery change
 → Li-ION battery with 9,0 kWh (410Ah)
